

## MUNICIPAL BUILDING IN POLICHNI

PROJECT BUDGET: 5.800.000 €  
ARCHITECTURAL DESIGN: MELETITIKI - TOMBAZIS Ltd  
STRUCTURAL DESIGN: KANON CONSULTING (2010 - 2011)

*Architectural Elevation and Cross Section of the Building*

"Kanon Consulting" is collaborating with the office of the internationally acclaimed architect A. Tombazis to develop the design of the new Municipal Building of the city of Polichni in the area of Thessaloniki in Northern Greece.

*Structural Model of the Building*

The building will house the office of the Mayor and the Municipal Council, as well as related municipal services. It will also have a 250 seat auditorium to host cultural activities. The basement floor will house E/M installations and will also include a parking garage. The total usable surface of the building is 2815m<sup>2</sup>. The architectural design has been based on the principles of bioclimatic design for heating, cooling and natural lighting. Due to the sloping surface of the plot, the building height varies from two to five levels including the basement. The final design has been completed and the issue of a building permit is pending. Construction detailed design will follow prior to tender.
